

Best Management Practices for Homeowners

The Town of Loomis's Stormwater Quality Program, states that it is "unlawful for any person to make or cause illicit discharges." Here are some ways that will help avoid violations, and will help protect our waterways.

Drain your swimming pool or hot tub only when a test kit does not detect any chlorine or other toxic chemicals. Check with the Sewer District before discharging swimming pool water into a public sewer.

Wash pool filter in a sink or on the lawn to prevent stormwater contamination.

Store pool and spa chemicals in a covered area to avoid exposure to stormwater.

Have your septic system inspected by a professional at least every 3 years, and have the septic tank pumped as necessary.

Use pesticides and fertilizers sparingly and according to directions. Avoid application if rain is in the forecast.

Put trash can out only on collection day to prevent animals from spilling.

Vegetate or mulch bare spots in your yard to prevent erosion.

Don't over water your lawn, letting water run off into the storm drains.

Check your vehicles, machinery and equipment for leaks and spills. Make repairs as soon as possible. Clean up spilled fluids with an absorbent such as kitty litter. Do not hose spills into the street, gutters or storm drains.

Sweep up sidewalks, patios, and decks of yard debris and dispose of it in a covered compost pile or trash can. Do not hose, sweep, or blow yard debris into street, gutters, or storm drains!

Direct pressure-washing runoff onto an unpaved surface or vegetated area, not into the street, gutters, storm drains, or public sewers.

Always recycle automotive fluids at appropriate disposal sites or recycling facilities. See county web site for locations.

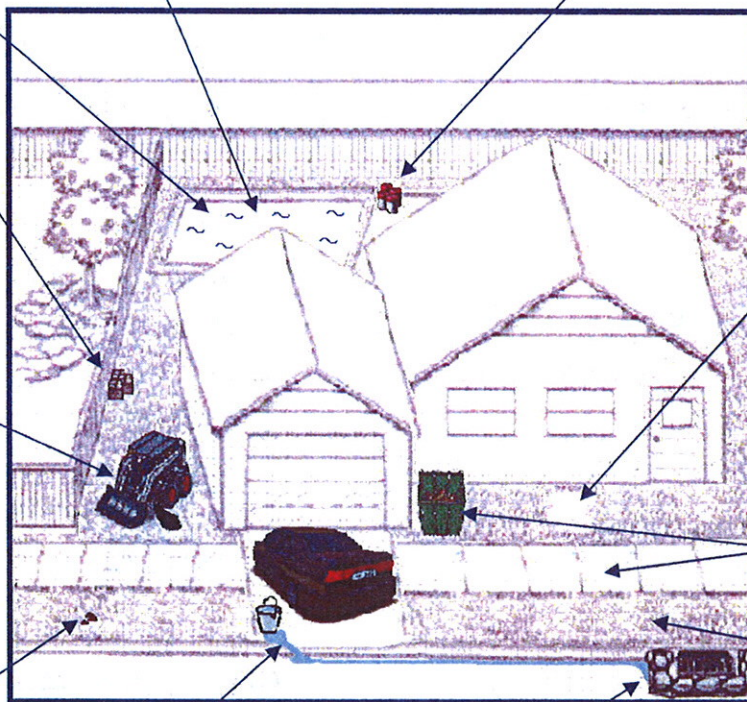

Pick up pet waste. Flush or secure it in a plastic bag and dispose of it in your trash.

Do not connect downspouts to drainage pipes. Allow to drain to vegetated areas.

Use a commercial car wash or wash your car on a lawn or other unpaved surface to reduce the amount of car wash water runoff.

Before beginning an outdoor project, protect all storm drains nearby by covering and capturing sediment.

Clean water based painting equipment in the sink, not outdoors. Dispose of excess paints, cleaners, solvents, etc. through a household hazardous waste collection program.

Stormwater Quality Contact and Event Information

Town of Loomis Stormwater Quality Contact

Phone: (916) 652-1840
6140 Horseshoe Bar Road #K
Loomis, CA 95650
